

### **Ulrich Neumueller**

#### **Consultant for Asset Management and Maintenance**

Ulrich Neumueller (born 1977) worked – after a apprenticeship to electrician (1995) – first for MTU Aero Engines GmbH, Munich in the department maintenance for tool machines.

In the following time he was given new tasks and he grew up as a Supervisor for electrical maintenance and also as temporary head of maintenance in a production center. In this function he was also responsible for SAP R/3 PM, MM implementation as well as for continuous improvement process.

Since 2005 he worked in different leading functions for Siemens AG, Unit Industrial Solutions: Head of maintenance, later on head of service point (for Intralogistics). Additionally he led diverse projects like audits and asset optimizations.

Afterwards he changed into the headquarter as international consultant for consultancy, analysis, conceptual designs, contracts and implementation of global improvement projects. Further on the product management therefore belonged also to his tasks.

As senior consultant he was in charge of project leading for consultancy, implementation and outsourcing, as well as for international research&development projects for service innovations, beginning from 2010.

His work ethics is team-orientated, open minded and based on intercultural understanding. He also has well-founded experiences in Asset Management and maintenance optimizations, in leading workforce and implementation of added value processes and structures.

During the last years many further educations were done: Bachelor of Business Administration, Technical Business Economist, master-school of electronics, Maintenance Manager (TÜV), Energy Manager (TÜV) and Project Manager just to mention a few.

He was chosen for the junior development program of MTU Aero Engines GmbH and spokesman for a junior development circle of Siemens AG.

In 2011 he founded his own company to provide this knowhow as consultant and coach. The portfolio is strategy and competence development, optimization of Asset Management and maintenance organizations, control of change processes, realization of cost improvements and increasing the efficiency and effectiveness of productivity.

Mister Neumueller also works as journalist, author of specialist publications and speaker on congresses. Further on he is an active member of Chambers of Commerce and Industry (IHK Schwaben), Forum Vision Instandhaltung e.V., Gesellschaft für Instandhaltung e.V., Institute of Asset Management (IAM London), German Institute for Standards (DIN) and supporting member of Kindernothilfe e.V.

In 2012 the German Institute for Standards (DIN), located in Berlin, delegated Mr. Neumueller into the Committee of International Organization for Standardization (ISO) to represent the German position in developing the ISO55000 Series (Asset Management).
